

# Exder update August 2024

Exder was updated as of August 17 (update window 8:00-12:00 pm. CET).

All messages through Exder during the update were queued and processed once update was completed.

You do not need to do anything, your Exder service is automatically updated to the newest version.

The update addresses some minor bugs, improvements and the new GDSN article information version 3.1.28.

If you have any questions, you are as always welcome to contact our support.

Best Regards,

Tungsten Automation Exder team
